

AHMED MOHAMED AHMED ALI

Data Scientist | AI Student

Sharqia, Egypt | +20 1062270161 | aly86933@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Third-year Artificial Intelligence student focused on data science, machine learning, and applied deep learning. Experienced in Python, SQL, data preprocessing, exploratory data analysis, model evaluation, and building reproducible workflows using Pandas, scikit-learn, TensorFlow, and Keras. Developed practical projects covering classification, NLP, time-series modeling, and image classification.

TECHNICAL SKILLS

Programming: Python, SQL

Data Analysis: Pandas, NumPy, Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, Statistical Analysis

Machine Learning: scikit-learn, Classification, Regression, Feature Engineering, Model Evaluation, ROC-AUC, Confusion Matrix

Deep Learning: TensorFlow, Keras, CNN, RNN, LSTM, GRU, Neural Networks

Visualization: Matplotlib, Seaborn

Tools: Git, GitHub, Jupyter Notebook, IBM Cloud

PROJECTS

Breast Cancer Classification | Python, scikit-learn | [Repository](#)

- Built a supervised machine learning model to classify tumors as malignant or benign using Logistic Regression and Decision Trees.
- Achieved 95.61% accuracy and 0.9950 ROC-AUC on the Breast Cancer Wisconsin dataset.
- Applied preprocessing, train-test splitting, model evaluation, and performance comparison workflows.

Deep Learning Model Comparisons | TensorFlow, Keras | [Repository](#)

- Implemented and compared RNN, LSTM, and GRU architectures for NLP and time-series learning tasks.
- Evaluated model performance, training behavior, loss curves, and handling of long-term dependencies.

Applied Deep Learning | CNN, RNN, LSTM, GRU | [Repository](#)

- Developed deep learning notebooks for image classification and sequence modeling tasks.
- Used TensorFlow and Keras for preprocessing, training, evaluation, and visualization workflows.

EDUCATION

Zagazig University - Faculty of Computers and Information

B.Sc. in Computers and Information, Artificial Intelligence Department

Expected Graduation: 2027

COURSES AND TRAINING

Data Scientist Track - DEPI (MCIT & IBM) | Oct 2025 - May 2026

- Studied Python, SQL, Data Visualization, Statistical Modeling, and Machine Learning workflows.
- Completed practical labs and projects using IBM Cloud and JupyterLab.

AI and Machine Learning - Route Academy | 2025

- Learned supervised and unsupervised machine learning concepts with practical implementation using Python and scikit-learn.
- Applied preprocessing, feature engineering, model evaluation, and introductory deep learning techniques.

LANGUAGES

Arabic: Native | **English:** Good Working Proficiency
